The following table provides a list of some of the most popular Cable companies in the United States. Cable companies in the United States are not subject to mandatory open access but may voluntarily offer open access of their cable plant pursuant to 47 U.S.C. §§ 541-555, commonly referred to as the "Cable Act of 1984" or "Open Cable". Equipment is not subject to mandatory open access either, but the FCC has adopted rules encouraging manufacturers to provide equipment for use by competing cable service providers (including telephone companies) on reasonable terms and conditions. In the U.S., prices charged by cable operators vary widely, and change frequently. The FCC does not regulate cable prices or rates.

The following table provides a list of some of the most popular Cable companies in Canada.

The following table provides a list of some of the most popular Cable companies in Australia:

The following table provides a list of cable companies and associated brands:

The following tables provide lists of some of the more notable IPTV providers in North America. IPTV is delivered globally but this article will only focus on the North American market.

It is believed that there are at least two open-sourced IPTV receivers that support the ATSC standard. Due to the large number of options available, it is not feasible for this article to list all of them. The following table provides a list of cable companies and associated brands:

The following table provides list of some of the most notable IPTV providers in North America. IPTV is delivered globally but this article will only focus on the North American market.
